

High Density **Blac-Kut** Discs

The right abrasive for the right price.

Our new High Density Blac-Kut Flap Discs are made of a premium Zirconia Alumina material with an increased number of flaps, and larger flap sizes will ensure longer life.

The aggressive zirconia grains allow for high material removal and the brittle cotton cloth for equal abrasion with the grains. This surface grinding flap disc can also distribute pressure easily, and with added increased strength on the back of the cloth, the Blac-Kut Flap Disc is able to handle the job.

Characteristics & Applications	Materials	Tool Selector
<ul style="list-style-type: none"> - 100% cotton cloth with resin over resin bonding, zirconia alumina grains. - Available in Type-27 and Type-29. - Available in 40, 60, and 80 grits. - Available in a 4.5-inch diameter. - Ideal for surface metals and steel. - Preferred for surface grinding. 	<ul style="list-style-type: none"> ● Ferrous ● Non-Ferrous ● Stainless ● Exotics ● Metal Matrix
